

SAKSHI KADAM

Computer Engineering Student | Aspiring Full-Stack Developer

Pune, Maharashtra | 9405771810 | ksakshisachin@gmail.com

[linkedin.com/in/sakshi-kadam-4b0b1334a](https://www.linkedin.com/in/sakshi-kadam-4b0b1334a) | github.com/sakshi-9107

PROFILE

Third-year Computer Engineering student (9.27 SGPA) with hands-on experience building full-stack web applications (Node.js, MySQL) and an AI-based image verification system. Seeking a software development internship to contribute to real-world projects and grow as a full-stack developer.

EDUCATION

Sinhgad College of Engineering, Vadgaon, Pune

Expected 2027

B.E. Computer Engineering (Third Year) | SGPA: 9.27 | Rank 2 in First Year

Relevant Coursework: Data Structures, Object-Oriented Programming, DBMS

Silver Crest Junior College

2024

HSC: 90% | Rank 2 | Student of the Year Award

Secondary School Certificate (SSC)

2022

89%

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL

Web: HTML, CSS, JavaScript, Node.js

Database: MySQL

AI/ML: Image classification with Teachable Machine

Concepts: REST-style backend integration, OTP-based authentication, role-based access

Tools: Git, GitHub

PROJECTS

AI-Enabled Marine Pollution Reporting System

Individual Project

Tech: HTML, CSS, JavaScript, Node.js, MySQL, Teachable Machine | <https://github.com/sakshi-9107/marineguard-backend>

- Built a full-stack platform where users report marine pollution by uploading images, with the location captured automatically via GPS.
- Trained Teachable Machine models to validate each upload: checks if it is marine-pollution related, real or AI-generated, then classifies the type (plastic, floating, fishing, algae, oil spill, clean) and severity.
- Implemented secure authentication in Node.js: email OTP verification at registration and a forgot-password reset flow.
- Added role-based access: users view only their own reports, while admins view all reports and update status from pending to completed.
- Stored users and report data in a MySQL database; integrated maps to display reported pollution locations.

To-Do List Web Application

Group Academic Project

Tech: HTML, CSS, JavaScript, MySQL | <https://github.com/sakshi-9107/todo-project>

- Developed a task management web app supporting add, edit, delete, and mark-complete operations.
- Connected the frontend to a MySQL database through backend integration for persistent task storage.
- Contributed to user interface development and database-connected functionality as part of a team.

HACKATHON

Smart India Hackathon (SIH) 2026

Frontend Developer

Problem SIH26161: Dam Break Inundation Modelling Using Hydrodynamic Modelling of any River

- Team selected for the further round of the competition.
- Designed and implemented the frontend interface for the team's working prototype.

AWARDS

- Rank 2 in First Year**, Sinhgad College of Engineering
- Rank 2 in HSC** and **Student of the Year Award**, Silver Crest Junior College
